

The ecash PubPay is an easy to use integrated cash dispensing payment solution ideal for all gaming venues

PubPay allows the venue operator to dispense cash on demand, perform maintenance, cash reconciliation and replenishment through a simple touch screen. PubPay is typically installed behind the 'cage' or within the secure cashier area of a venue.

PubPay is designed with a secure safe and a fast, highly reliable cash dispensing system. PubPay is intuitive and allows cashiers to perform a range of payment and auditing transactions for gaming machine payouts including 'cash out' for float top up whilst keeping your cash safe.
